EXECUTIVE SUMMARY

Subproject Scope. The Tamil Nadu Urban Flagship Investment Program (TNUFIP) is designed under the multi tranche financing facility (MFF) modality of the Asian Development Bank (ADB) financing and will primarily focus on improvement of water supply and sewerage services, strengthening of urban governance and urban management in selected cities of the state. Tiruppur City Municipal Corporation (TCMC) is one of the selected urban local bodies (ULBs) and its water supply scheme will have improved and assured water supply for a target population of 15.5 lakhs within the ultimate design year of 2050. TCMC was formed by annexing two adjoining local bodies and six village Panchayats effective in October 2011. Proposed water supply improvement scheme (WSIS) subproject includes components like (i) increased capacity of raw water pumping mains, (ii) conveyance of raw water to water treatment plant, (iii) transmission of clear water to service reservoirs, (iv) pipeline laying in distribution system network, (v) construction of additional 29 overhead tanks (OHTs), and (vi) connection of clear water pipelines to 1.6 lakhs households by 2050.

Key Findings. The proposed WSIS subproject does not entail any involuntary private land acquisition. The head works and additional pump sets at raw water intake point, will be established within the premises of existing WSIS facilities. New OHTs will be constructed on government revenue department land and corporation land or within existing facilities' compounds in the Tiruppur Corporation limits. The raw and clear water mains will be laid within the right-of-way (ROW) of the highways, major district roads (MDR) and rural roads; distribution system pipelines will be laid mostly in Corporation roads and do not involve any land acquisition. Water treatment plant (WTP) will be constructed on 6.82 acres of land proposed at Odderpalayam, near Annur which is the ridge point between the source and Tiruppur City. The land proposed for WTP and approach road is obtained by donation from the Tiruppur Exporters Association (TEA). The said land parcel has been purchased through a negotiated settlement and registered by TEA Foundation after full and final payment to the original landowners. An agreement was signed between TEA Foundation and the landowners for sale of the said land parcel on 8 October 2018. It has subsequently been gifted and transferred in the name of Commissioner, Tiruppur City Municipal Corporation, and the gift deed was executed on 7 December 2018. An independent third party will be engaged to certify execution of land donation in a fair and transparent manner. The third party validation process will be completed prior to start of construction work.

Some temporary economic impacts have been envisaged for roadside stalls/shops/kiosks or small business enterprises (SBEs). In all, 21 potential SBEs will face temporary disruption of trade and business and 3 common property resources (CPRs) will face restricted access, during the construction period. Majority of the shops accounting for 76% are operating from temporary structures. Most of them (54%) have been operating their businesses for a period not more than 10 years. Out of 21 temporarily affected persons, 48% are vulnerable.

Recommended Actions. The draft resettlement plan has been prepared for Tiruppur WSIS subproject in accordance with ADB's Safeguards Policy Statement (SPS) 2009 and resettlement framework prepared for the TNUFIP. A total resettlement budget of ₹1,086,332 has been estimated for providing resettlement assistance including temporary livelihood loss of 25 days each to 21 SBEs and cost of detailed measurement survey, consultations, grievance redressal, disclosure, and third party certification. The resettlement plan analyses temporary economic impact envisaged during construction/pipe laying and provides mitigation measures to address the temporary impact. A detailed measurement survey (DMS) will be conducted in sections ready for implementation based on the detailed design, and the draft resettlement plan will be updated, based on survey results. The updated resettlement plan will be submitted to ADB by program

management unit (PMU) for approval. This resettlement plan indicates institutional framework, implementation arrangement with schedule of all activities, grievance redress mechanism, consultation, disclosure activities and monitoring, and reporting and evaluation of resettlement plan implementation. Summary of the resettlement framework and the resettlement plan, translated in local language, will be made available for distribution among the stakeholders. The complete document will be uploaded on TCMC, PMU, and ADB websites. The social safeguards officer (SSO) of program management unit (PIU) will be responsible for updating and implementing the resettlement plan. A construction management and supervision consultant (CMSC) engaged during tranche 1 implementation will support PIU in implementation and monitoring of resettlement activities. Likewise, the governance improvement and awareness consultant (GIAC) will assist in monitoring resettlement plan implementation. The social project officer of PMU is responsible for approval and implementation monitoring of the resettlement plan.

I. SUBPROJECT DESCRIPTION

- 1. The proposed Tamil Nadu Urban Flagship Investment Program (TNUFIP) under multi tranche finance modality will develop priority water supply, sewerage, and drainage infrastructure in 10 cities in selected major economic corridors. These are: (i) Chennai–Hosur, (ii) Chennai–Tiruchirappalli, (iii) Coimbatore–Madurai, (iv) Coimbatore–Salem, and (v) Madurai–Thoothukudi. The focus areas of support are: (i) urban infrastructure for universal access to 24x7 water supply services and sanitation facilities including tertiary treatment of sewage;¹ (ii) five industrial corridors developed (footnote 1); (iii) quality of life for all, especially the poor and the disadvantaged improved;² and (iv) a clean and sustainable environment provided³.
- 2. The TNUFIP is envisaged to be structured under three main components: (i) investment in municipal infrastructure namely water supply and sewerage; (ii) municipal reform-based activities; and (iii) technical assistance for design, supervision, program management, reforms, and climate change. TNUFIP will be implemented over an 8-year period beginning in 2018 and will be funded by Asian Development Bank (ADB) via its multitranche financing facility (MFF). The impact of the TNUFIP will be improved quality of life and resilience in select urban areas of economic importance in Tamil Nadu.
- 3. Tiruppur City Municipal Corporation (TCMC) was formed by annexing two adjoining local bodies and six village panchayats effective in October 2011. The total area of the corporation is 159.35 square kilometer (km²) and total population as per 2011 census is 877,778. The corporation is divided into 60 administrative wards. The city is the headquarter of the district of Tiruppur, situated at a distance of 448 kilometer (km) south west of Chennai and an important industrial centre in Tamil Nadu.
- 4. New Tiruppur Area Development Corporation Limited (NTADCL) was established as a special purpose vehicle (SPV) by Government of Tamil Nadu (GOTN), Infrastructure Leasing and Financial Services Limited (IL&FS) and Tiruppur Exporters Association (TEA) with the primary objective of improving local infrastructure bottlenecks, mainly water supply and sewerage in TCMC and eight village panchayats and industries located in the Tiruppur Local Planning Area (TLPA).
- 5. The improvements to water supply system will comprise creation of additional infrastructure to the existing water supply system, augmentation of water supply source, additional storage reservoirs, augmenting or providing conveying mains to the OHTs, and rezoning the distribution system to achieve equitable supply, augmentation of distribution system for 135 liters per capita per day (LPCD) and for the 30-year design horizon (Year 2050), rehabilitation and replacement of pipes, expansion of water supply distribution network to the uncovered areas so as to achieve equitable and daily supply of water to all the population of 15.50 lakhs for the ultimate design period of 2050 in Tiruppur Corporation.

The proposed subproject components comprise:

6. **Raw Water Intake and Pumping Main -** The proposed project intake source is located at a distance of 2.5 km downstream from Samayapuram barrage 1. The head works consisting of

¹ Government of Tamil Nadu. 2012. <u>Vision 2030</u>. Chennai.

² Government of India. 2015. <u>Mission Statement and Guidelines</u>, <u>Atal Mission for Rejuvenation and Urban Transformation (AMRUT)</u>. New Delhi.

³ Government of India. 2015. <u>Smart Cities - Mission Statement and Guidelines.</u> New Delhi.

check dam, river intake, and raw water pumping station, is proposed to be located adjacent to the existing head works for Scheme I on the bank of River Bhavani in Mettupalayam. Bhavani River is a perennial river with reliable and sufficient quantity of water availability during all seasons. The total quantum of water being released daily from Pillur Dam after power generation is 24 million cubic feet. Besides, the runoff from the nearby catchment area such as mountains, flows from Kallar River and small stream on the upstream adds to the flow in the river. No source sustainability issues or downstream impacts are assessed.

- 7. **Raw Water Transmission Main.** From the intake well on the bank of river Bhavani, the raw water pumping main will convey 197.03 million liters per day (MLD) and 271.86 MLD of raw water for year 2035 and year 2050 respectively to the proposed water treatment plant located at a distance of about 19 km.
- 8. **Water Treatment Plant.** A new water treatment plant (WTP) will be constructed on 6 acres of land proposed at ridge point in Oddarpalayam Village near Annur. The treatment plant has been designed to treat 270 MLD of raw water (ultimate stage requirement). The land proposed for WTP and approach road is obtained by donation from the Tiruppur Exporters Association (TEA). TEA had initiated the process of acquiring this piece of land for WTP construction earlier under Atal Mission for Rejuvenation and Urban Transformation (AMRUT), and not in anticipation of ADB funded TNUFIP. The purchase of land was completed on 8 October 2018 along with disbursement of final payment. Procedures of obtaining land and required validation by third party are stated in the chapter on scope of land acquisition and resettlement.
- 9. Clear Water Transmission System. From the clear water reservoir proposed at ridge point (WTP area), the clear water will be conveyed by gravity to the existing overhead tanks (OHTs) within the erstwhile municipal area and to the proposed OHTs within the added areas of TCMC. The total length of clear water mains from clear water reservoir to existing and proposed OHTs

 is 148.310 km with diameters varying from 1,800 millimeters (mm) to 150 mm. The clear water mains are proposed along the state highway from Annur to Avinashi. After crossing national highway, the alignment will be along state highways and local roads.
- 10. **Storage Reservoirs.** There are 70 water supply distribution zones throughout Tiruppur Corporation area. These zones will have OHTs which will directly receive water from the proposed water supply scheme. Out of 55 proposed OHTs, 29 new OHTs will be built under the ADB financed subproject. The remaining OHTs will be constructed under Government of India's AMRUT scheme by the Tamil Nadu Water Supply and Drainage (TWAD) Board.
- 11. **Distribution System.** The entire corporation area has been divided into 70 water supply distribution zones based on the contour levels of the city. Each water supply zone is provided with one OHT and water distribution system.
- 12. **House Service Connection.** About 160,000 house service connections are proposed in the new distribution system. A description of proposed subproject components is provided in Table 1.
- 13. The draft resettlement plan has been prepared for water supply improvement scheme (WSIS) subproject for identified areas under TCMC in accordance with the draft resettlement framework for TNUFIP. A detailed measurement survey (DMS) will be undertaken during implementation phase in line with detailed design, and the draft resettlement plan will be updated,

if required based on detailed measurement survey data. The updated resettlement plan will be reviewed by the program management unit (PMU) and submitted to ADB for approval.

Table 1: Description of Proposed Subproject Components

	Table 1: Description of Proposed Subproject Components								
SI			Capacity/ Design	Distance/					
No.	Component	Location	period	Length	Remarks				
1	Raw water intake well in River Bhavani to house 8 nos. of pump sets.	Mettupalayam on the bank of River Bhavani	Ultimate design period 2050	55 km from Tiruppur	Designed for total estimated population of 1,950,000.				
2	Raw water transmission main	Along state highway till Annur WTP site	193 MLD for intermediate design period of 2035 and 272 MLD for ultimate design year of 2050	19 km	Transmission mains will pass along state highway and Urban Local Body roads.				
3	WTP	Odderrrpalayam, near Annur ridge point	196 MLD for intermediate design year of 2035 and 270 MLD for ultimate design year of 2050	-	Land obtained by donation from TEA. Land was purchased through a negotiated settlement from private landowners by TEA and agreement signed between landowners and TEA Foundation on 8 October 2018. ^a TCMC will engage an independent external/third party for validation of the process. The terms of reference for the third party validation is provided in Appendix 13 and 14. ^b				
4	Clear water gravity transmission mains	Along state highway and local roads to storage reservoirs	-	148.3 km	Proposed pipelines will pass through one side of the state highway and cross the national highway in places.				
5	Storage reservoirs/OHT	29 new OHTs spread throughout distribution zones of the City	Capacity varying from min of 5 lakh litres to max of 20 lakh litres	-	The reservoirs will cover 70 distribution zones.				
6	Distribution system	The distribution system will cover 29 water supply distribution zones of TCMC	Pipelines with dia varying from 110 mm to 500 mm	-	The system is designed at 135 LPCD for a total population of 160,000 for ultimate design year of 2050.				

km= kilometers, LPCD= liter per capita per day, MLD= million liters per day, mm= millimeters, Nos.= numbers, OHT= overhead tanks, TCMC= Tiruppur City Municipal Corporation, TEA= Tiruppur Exporters Association, WTP= water treatment plant.

Source: New Water Supply Scheme, Detailed Project Report: November 2017, Tiruppur City Municipal Corporation.

^a Appendix 4 exhibits final land purchase registration document between Tiruppur Exporters' Association and the land owners.

^b An independent external party will be engaged to ensure and certify the requirements as per clause 28 of resettlement framework and ADB SPS, 2009.

II. SCOPE OF LAND ACQUISITION AND RESETTLEMENT

- 14. In keeping with the subproject selection criteria, new construction, rehabilitation and provision of water supply network will avoid, if possible or minimize involuntary resettlement impacts. The proposed water supply improvement scheme will not require fresh land acquisition or cause permanent displacement for any of its components. Construction of proposed raw water pump sets, transmission mains, OHTs, and laying of pipelines will be accommodated on vacant government or corporation land, on riverbank or within the premises of existing facilities. The location for head works/intake well of the proposed new water supply scheme will be river Bhavani and new pump sets will be installed within vacant area of existing water supply infrastructure under Scheme I.
- 15. Land for constructing WTP and developing approach road to the WTP is donated by the TEA to TCMC. Tiruppur Municipal Corporation identified suitable land for WTP location based on topography. Being a ridge point, the location has a technical advantage. TEA had initiated the process for purchase of 6 acres of land from 7 landowners for construction of WTP and access road under AMRUT scheme much before commencement of ADB project preparation.⁴ Part payment of 70% was made earlier as per market rate and accepted by the landowners. The purchased land was registered on 8 October 2018 after making full and final payment of ₹3.20 crores (₹32 million) as compensation (Appendix 4). This land parcel was not acquired in anticipation of ADB funded TNUFIP. The land parcel was gifted in favour of commissioner, TCMC and registered on 7 December 2018 and the details are provided in Appendix 5. Third party validation will be carried out and completed prior to start of construction work.
- 16. An independent external party was engaged by TCMC to ensure and validate that the donation has been made in a fair and transparent manner, that the land donation does not come from coercion or asymmetrical power relation between the landowner and the corporation. The third party certification will include minutes of consultation meetings held with erstwhile landowners, TEA Foundation representatives and TCMC.⁵
- 17. Clear water transmission mains and distribution network system will be laid in state highways, major district roads (MDR) and other rural roads within the right-of-way (ROW) and necessary permission will be taken to lay the pipelines below the surface. The pipelines will be laid along one side of the road and where necessary, trenchless technique will be adopted for road crossings. The clear water transmission mains/feeder mains will convey water to proposed 29 OHTs spread across 70 water distribution zones, and all the locations are either on corporation/government land, or government sites reserved for development purpose. Detailed survey was conducted by means of transect walks in July-August 2018 along all the WSIS components, including water distribution network alignments along highways and MDRs to identify any potential impact. No encroachment on the ROW or on carriage way of the roads was observed. Some temporary economic impacts in the form of disruptions of business and temporary income loss or restriction of access to roadside shops and residences during construction phase are likely. In all, 21 small business enterprise (SBEs) owners, and three common property resources (CPRs) will be affected. The affected businesses shall be compensated for the losses for the actual duration of impact in line with the agreed Resettlement Framework and such impacted entities will have the right to continue with their businesses at their original location. TCMC has assured continuation of their business at the present place after

⁴ Press Information Bureau. 2015. Government of India. <u>Tamil Nadu Seeks to Address Water Woes in Urban Areas under Atal Mission for Rejuvenation and Urban Transformation Action Plan for 2015–2016. Chennai.</u>

ADB. 2018. Report and Recommendation of the President to the Board of Directors: Tamil Nadu Urban Flagship Investment Program. Resettlement Framework (accessible from the list of linked documents in Appendix 2). Manila.

pipelines are laid and excavated portions are levelled. Some roadside mobile vendors will shift to nearby places. Residents along road will need access to their houses during pipelines laying.

- 18. Private commercial vehicles were found to have been parked on roadside pavements or nearby vacant plots at various locations near markets. Consultation with a few truckers was held at Annur market crossing to assess unanticipated impact on parking of commercial vehicles during pipe laying. It is noted that the trucks usually park near the markets for ease of unloading and discharging goods and rarely stop for more than a few days. They do not anticipate any loss of income or obstruction to their usual route of travel. Consultation brief is given in Chapter IV.
- 19. The roadside mobile vendors, and stationary vendors (who spread their merchandise on footpath, road kerb) and residents will not incur any economic loss and hence compensation or assistance will not be paid. Appendix 1 depicts a summary profile of the SBE owners incurring economic loss with brief details. Based on the identified potential impact, and consistent with ADB Safeguards Policy Statement (SPS) 2009, the Tiruppur WSIS subproject is classified as involuntary resettlement category B. This resettlement plan document is prepared in line with ADB SPS 2009 and resettlement framework prepared for TNUFIP.
- 20. To further minimize temporary impacts, construction work will be carried out during early hours of the day or at night in order to avoid inconveniences to the public as well as small business owners and vendors, wherever possible. Project implementation unit (PIU) will ensure that all kinds of safety measures are followed by the contractor to protect safety and security of public, vendors and residents. Construction schedule will be planned with due recognition of peak hour, festive occasion, special business days in consultation with vendors, SBE owners with temporary economic impact, market committee, if existing and residents. Appendix 7 provides sample safety measures that minimize temporary impact during pipeline laying.
- 21. Table 2 provides the details of proposed subprojects under Tiruppur WSIS and anticipated involuntary resettlement impacts.

Table 2: Summary of Involuntary Resettlement Impacts for Tiruppur Water Supply Improvement Scheme Subproject Components

SI. No.	Subproject Component	Scope of Land Acquisition and Involuntary Resettlement	Mitigation measures
1	Raw water intake well and pump sets – 8 nos.	Located within existing water supply infrastructure of Scheme I and II of TCMC. Land belongs to TCMC.	No involuntary resettlement impact involved.
2	Raw water transmission mains	Raw water will be conveyed by pipelines through one side of the state highway, MDRs, and local roads along a length of 19 km from head works/intake well. Pumping mains will be laid about 2.8 m below the surface within existing ROW. However, temporary disruption of access for one temple, (CPRs) near railway line and for about 10 residential houses along Mettupalayam – Avinashi road has been noted.	Necessary permission will be obtained from State Highway Department. No encroachers/squatters by road side detected. Temporary or permanent economic impact in terms of loss of income/business is not envisaged. One temple (CPRs) is located by road side near proposed tunnel entry point for raw water transmission main to be laid below railway line. Access to road side temple will be obstructed during construction period. Consultation with the temple users was held. No loss of structure or income is envisaged. Access to the temple will be ensured by contractor during construction. (Consultation brief presented in Chapter IV)
3	WTP	The WTP with access road is proposed to be located at Oddarpalayam near Annur. Land will be obtained under donation from the Tiruppur Exporters Association.	No fresh land acquisition is needed and no squatters or encroachers identified. Hence involuntary resettlement issue is not envisaged. Purchase of land parcel of 6 acres identified for construction of WTP was initiated under AMRUT scheme much in advance of commencement of ADB project. Advance payment of 70% land cost was made in early 2018 by TEA. Full payment of compensation has been made at negotiated price and land purchase deed was registered on 8 October 2018. Subsequently, the Association donated the land to TCMC. Deed of gift has been registered on 7 December 2018 (Appendix 4 and 5). Negotiated settlement was followed and the landowners agreed to the price settled. A note on consultation held with the landowners is presented in Chapter IV. No involuntary resettlement issue is foreseen. However, due diligence will be required which will include: (i) evidence of donor being the owner of the land parcel and extent of land to be gifted, (ii) an official certification from TCMC stating that all compensation has been paid in full to the erstwhile landowners and that compensation has been made as per market rate, (iii) that there is no pending court case or litigation or dispute related to said land, (iv) that gift deed is

SI. No.	Subproject Component	Scope of Land Acquisition and Involuntary Resettlement	Mitigation measures
			registered in the name of TCMC, and (v) a third party certification stating land donation has been executed in fair and transparent manner. The final Resettlement Plan will be prepared with all the documents related to gift of land by TEA Foundation to TCMC, including third party certification. Before due diligence with required documents related to the said land for WTP is submitted, land will not be handed over to contractor for construction.
4	Gravity mains for clear water transmission	Clear water will be conveyed by gravity mains of 550 mm to 1800 mm dia along one side of the state highway, MDRs, rural roads, and crossing national highway in some places. The pipelines will be laid at a depth of 2.8 m below surface and after laying, the trenches will be covered and restored to original surface condition. All works will be done within ROW of government roads. About 21 shops with potential temporary economic impacts are identified and will be assisted during the implementation of the project. Near Annur market at highway crossing some private commercial heavy vehicles may experience temporary obstruction to parking for limited period. No economic loss is envisaged.	No land acquisition or any major involuntary resettlement impact is envisaged. However, temporary economic impacts to some shops/stalls/vendors/ kiosks are identified and these will be properly addressed. Details are provided in Appendix 1. Parking of commercial vehicles will be verified at the time of implementation. Consultation held with the truckers of parked vehicles revealed that they do not anticipate any loss of income or obstruction to parking for long period. During implementation, issue of temporary parking will be addressed as per requirement. Consultation brief is noted in Chapter IV.
5	Storage reservoirs	In all, 29 new OHTs will be constructed spread over TCMC distribution zones. All OHTs will be located within either corporation land, government revenue land, river side PWD land, and reserve sites of housing complex set aside for development works by government/city corporation. Two OHTs are proposed: (i) at one corner of a playground allowing rest of the field open for use as before after construction and (ii) within compound of a burial site (CPRs), all within government land. While playground will be closed for public access temporarily during pipelines laying days, for burial ground a separate entrance will have to be constructed prior to start of construction.	No land acquisition or involuntary resettlement is involved. No encroachers or squatters were identified within specified area for OHTs during transect walk. The following CPRs will have some marginal impact as discussed below. i) One OHT is proposed to be constructed at one corner of a playground used by local children in Thiru Ve Ka Nagar locality. The area of the said plot is 4.85 acres while only 0.06 acre will be required for construction of OHT. No obstruction to the playground is anticipated during installation and proper safety measures will be taken during construction to keep the place free of hazardous materials. ii) In another location – Noyyal burial ground – one OHT is proposed to be constructed on 0.11 acre of land while land available is 0.27 acre. Public consultation was held with the local community, who accepted the proposal of building OHT at the location. However, for continuation of the public utility without hindrance, a separate entrance gate with boundary wall will be built. Consultation held with the

SI. No.	Subproject Component	Scope of Land Acquisition and Involuntary Resettlement	Mitigation measures
			burial ground users and community is presented in the Chapter IV.
6	Distribution system	The distribution system pipelines will be laid along one side of the state highway, MDR and Urban Local Bodies/local roads where road width is less than 40 ft, and on both sides of the road where road width is more than 40 ft. In a few locations where road width is too narrow the pipelines will be laid in the middle of the road. Pipe laying will be done within existing ROW and at a depth of 1.4 m. Some temporary economic impacts have been identified along distribution system where shops/stalls/kiosks will incur temporary loss of access and loss of business/income during pipe laying period.	No land acquisition or involuntary resettlement impact of permanent nature is envisaged. Some temporary impacts are identified and appropriate measures will be provided as per resettlement framework prepared for TNUFIP.

AMRUT= Atal Mission for Rejuvenation and Urban Transformation, CPR= common property resources, ft= feet, km= kilometer, m= meter, mm= millimeter, MDR= major district roads, nos.= numbers, OHT= overhead tanks, PWD= Public Works Department, ROW= right-of-way, TCMC= Tiruppur City Municipal Corporation, TEA= Tiruppur Exporters' Association, TNUFIP= Tamil Nadu Urban Flagship Program, WTP= water treatment plant.

Source: New Water Supply Scheme, Detailed Project Report: July-August 2018, Tiruppur City Municipal Corporation.

Note: Land plan schedules with cadastral maps, land records of all OHT sites are provided in the Appendix 3. Details of registration of land purchase and gift deed of WTP land are provided in Appendix 4 and 5.

III. SOCIOECONOMIC INFORMATION AND PROFILE

- 22. Transect walks were conducted by the project preparation technical assistance (PPTA) social survey team including local surveyors and accompanied by TCMC engineers along all the WSIS components during July–August 2018 for a period of 4 days to identify involuntary resettlement impact, if any due to construction of the water supply scheme components. Government revenue/corporation land and other reserve sites set aside for development works have been identified and it was verified that no fresh land acquisition is required. Appendix 6 provides summary of land details, including area required, ownership status, and current land use of the land parcels selected for TCMC WSIS components. However, some temporary economic impact was identified in some locations along raw water transmission mains, gravity mains, and distribution system. There are 21 SBE owners operating from shops/stalls, kiosks who will be economically affected during pipeline laying period only. Some mobile vendors and stationary vendors⁶ with merchandise on sidewalks can move to nearby locations and will not be affected. Forty-six residents by the road side will require access to their residences during pipeline laying days.
- 23. Within the project area, three CPRs have been identified. Of these, a temple will have temporary impact of restricted access, which will be mitigated by the contractor during construction. One new overhead tank (OHT) is proposed to be constructed within the premise of the burial ground that will need a separate entrance. During consultations, the community expressed their acceptance of the proposed OHT location. For the third CPR, a playground, proper safety measures have been planned for safe access to the users. About 45 private commercial vehicles, mostly parked near Annur market, will have restricted access to their parking places and may need alternate parking space for the construction period. However, they will not incur any economic loss. This issue will be verified during implementation and will be addressed accordingly by traffic management measures, if necessary. Table 3 provides a summary of all economically affected small business enterprise owners and common property resources (CPRs).

Table 3: Distribution of Affected Small Business Enterprises/Common Property Resource with Temporary Impact

with remperary impact							
SI No.	WSIS Component	Shop/ Stall	Kiosk	Affected Persons	CPR ^a	Total	
1	Head works/ raw water transmission mains	2	3	5	1	6	
2	WTP	0	0	0	0	0	
3	Clear water mains	5	3	8	0	8	
4	Entrance/compound of OHT sites	0	1	1	2	3	
5	Distribution system	4	3	7	0	7	
	Total	11	10	21	3	24	

CPR= common property resource, OHT= overhead tank, WSIS= water supply improvement scheme, WTP= water treatment plant.

24. Majority of the 21 shops/kiosks are located along clear water mains and distribution system. All the 21 affected persons will incur loss of income and loss of access to their shops/stall/kiosks during construction period (Table 4). Out of three CPRs, one temple will face access disruption that can be mitigated through simple mitigation measures such as access planks and the second one, a burial ground, will also need a separate entrance built for continuity

^a Note: Common property resources (CPRs) include a temple, a playground, and a graveyard. Source: Field survey and Transect walk conducted in July-Aug 2018.

⁶ Stationary Vendor – are those who spread their merchandise on roadside pavement / footpath.

of public service. For the playground, the third CPR, the construction site will be guarded with safety barricades, and the users can access the ground with minimal restriction.

Table 4: Type of Temporary Impact⁷

SI No.	SBE / CPR	Total SBE / CPRs	Loss of Income	Loss of Access
1	Shop/ Stall	11	11	11
2	Kiosk	10	10	10
3	CPR	3	0	3
	Total	24	21	24

CPR= common property resource, SBE= small business enterprise. Source: Field survey and Transect walk conducted in July-Aug 2018.

25. Majority of the SBE owners (54%) have been running their business from their present location for a period of less than 10 years. (Table 5). All the three CPRs have been in use for more than 20 years. In all, there are 10 vulnerable affected persons accounting for 47.6% (Table 6).8 Two of the scheduled caste families also belong to below poverty line (BPL) category. None of the economically affected families belong to scheduled tribe, neither are any of them woman-headed (Table 7). During the survey, the potentially affected SBE owners/operators were surveyed to find out about their economic condition. It is found that nearly 81% of 21 SBE owners earn a monthly income varying from ₹5,500–₹10,000, and 4 (19%) families earn a low monthly income of ₹3,500–₹5,500 (Table 8). The SBE owners were further asked about their daily net profit earned from roadside business/ trade. Two-thirds (66.7%) of them earn a daily profit varying from ₹250–₹500 (Table 9).

Table 5: Status of Occupancy

	Small Business	Period of Business / Occupancy					
SI No.	Enterprise/ Common Property Resource (CPR)	< 10 yrs.	10 – 20 Yrs.	> 20 yrs.	Total

Table 6: Distribution of Vulnerable Affected Persons

SI No.	Small Business Enterprise/Residence	Total No. of Affected Persons	Total No. of Vulnerable Affected Persons	Percentage of Vulnerable to total Affected Persons
1	Shop/Stall	11	5	23.8%
2	Kiosk	10	5	23.8%
	Total	21	10	47.6%

Source: Field survey and Transect walk conducted in July-August 2018

⁷ Type of impact may be more than one for SBEs/affected persons; e.g. a shop may lose income as well as access. So number of each type of temporary impact may exceed total number of affected persons.

⁸ Vulnerable households include female-headed household, disabled, elderly living alone, scheduled tribes or scheduled castes, children living alone, Below Poverty Line households, and landless and non-titleholders. As per data published by the Planning Commission, Government of India, in 2011-2012, poverty line in urban Tamil Nadu was ₹993 per capita per month. On adjusting for inflation, this works out to ₹1,406 per capita per month in 2017-2018 or a monthly household income of ₹5,540 for BPL households, considering the average urban household size in the state per Census 2011.

Table 7: Type of Vulnerability

SI No.	Small Business Enterprise/ Residence	Total No. of Affected Persons	BPL	WHH	sc	Elderly Persons	Multiple vulnerability (SC and BPL)	Total Vulnerable Affected Persons
1	Shop/Stall	11	0	0	5	0	0	5
2	Kiosk	10	2	0	1	0	2	5
	Total Affected Persons	21	2	0	6	0	2	10

BPL= Below Poverty Line, WHH= women headed households, SC= scheduled caste.

- 26. During implementation stage, a detailed measurement survey (DMS) will be conducted where involuntary resettlement impact assessment will again be carried out according to final design of WSIS components. If any further impact is identified, the type of loss and nature of impact to each affected person will be assessed. According to principles of resettlement framework for TNUFIP, the compensation, assistances and benefits that the affected persons are entitled to will be determined and payment disbursed prior to commencement of construction work.
- 27. Apart from temporary impact, land parcels amounting to 6.82 acres had been obtained from eight landowners of Oddarpalayam village for construction of WTP and approach road by TEA and donated to the municipal corporation. TEA had initiated procuring land in January 2018 and after negotiation, purchased the land from the landowners of Oddarpalayam. The plot had been identified earlier under AMRUT scheme. No involuntary resettlement issues are assessed. The land owners have sold land parcels at negotiated price as per market guideline value and have expressed satisfaction with the rate . TEA Foundation has gifted the land in favour of the commissioner of Tiruppur City Municipal Corporation. A brief socioeconomic status of the land owners is presented below based on survey and interview of the landowners held on 25 November 2018.
- 28. Six acres of land for WTP was purchased from one landowner and 0.82 acres for approach road from six landowners. The total number of affected persons (members of landowners'

households) is 32. Except for the person who sold 6 acres land for WTP, all other six landowners live near the WTP site at Oddarpalayam village. During survey, three landowners were absent. The landowner with the largest landholding is an absentee landowner leaving land under care of a cultivator for farming. The cultivator is a paid employee of the landowner and will continue to cultivate and supervise farming of remaining 44 acres of land under cultivation. He does not stand to lose his present employment under the landowner and is not assessed as an affected person.

29. The total affected households are seven and affected persons is 32. Information on household details of one absentee landowner is not available. Table 10 shows key socioeconomic characteristics of the landowners.

Table 10: Socioeconomic Profile of the Landowners at Oddarpalayam,
Water Treatment Plant Site

SI. no.	Criteria	Nos. /Percentage /Acre	Remarks			
1	No. of Affected Household	7				
2	No. of Affected Persons	32				
3	Total Population	32				
4	Total Male	18				
5	Total Female	14				
6	Land loss – total	6.82 Acres				
7	Average Land loss (% age of total land owned)	8.63%				
8	No. of households with less than 10% loss of land	6	Voluntary sale through a negotiated settlement.			
9	No. of households with more than 10% loss of land	1	Land loss to one land seller (negotiated settlement) owning 50 acres of land is 12% of total land holdings (6 acres).			
10	Total working population	11	Information of absentee landowner not available			
11	Household income range	₹130,000- ₹2,000,000	Data of three households not available			
	Average household income (per year)	₹1,086,000	Same as above			

Source: Survey and interview with landowners, Oddarpalayam on 25 November 2018.

30. From the gathered information it can be concluded that none of the landowners have suffered major loss due to purchase of their parcels of land. Main occupation of majority of the landowners is agriculture. Major crops grown are coconut, turmeric, and maize. Apart from these crops, banana and sugarcane are also grown by a few farmers. Some of them have different types of businesses. Besides cultivation, the landowners have adopted various livelihoods as subsidiary sources of income. One person rears goats for sale. Another operates a motor driving training school, and one manages a savings and credit business. Based on the data collected from six households the average annual income of the households is ₹1,086,000. One household comprised of an absentee landowner. All the affected families belong to other backward castes. No member of the families is disabled. None of the landowners is vulnerable. A brief socioeconomic profile is annexed as Appendix 2.

IV. INFORMATION DISCLOSURE, CONSULTATION, AND PARTICIPATION

- 31. Consultations were undertaken at various phases of the PPTA activities for the WSIS subproject, such as: (i) during initial site visits to various WSIS components to assess potential involuntary resettlement impact, (ii) during interviews of land owners of WTP site from whom land parcels were purchased, and (iii) during transect walks along the WSIS components to identify potential temporary impact. The consultations and focus group discussions (FGDs) were held with all levels of stakeholders that include: (i) program beneficiaries, (ii) heads and other members of the potentially affected business/trade owners, (iii) landowners from whom land was purchased by TEA foundation, (iv) community representatives, (v) Tiruppur City Corporation officials including city engineer and his other officials, and (vi) local people residing near the proposed WSIS project facilities/components site.
- 32. During the transect walks at various locations, discussions were based on project related issues and benefits. The major topics of concern were: (i) time likely to be required for the construction/laying of pipelines and safety measures during that period, (ii) loss of livelihood by the roadside, and (iii) compensation for the same. This process actually helped to inform the people in general and those likely to be affected/benefitted, about project details, components, probable alignment design, and most importantly proposed mitigation measures that will be adopted to avoid or minimise any adverse impact. It was disclosed that further consultation will be undertaken during implementation stage, if there is design change and further resettlement impact is foreseen. These future consultations will include FGD sessions and census surveys during DMS before project construction starts. These will be carried out by construction management and supervision consultants (CMSCs) and social and resettlement expert (SRE) who will work closely with program implementation unit (PIU) and the assistant safeguard officer (ASO) PIU and monitored by the social project officer (SPO) of PMU. A city level stakeholder consultation involving representatives of all stakeholder groups is proposed during implementation phase, to inform stakeholders about technical details of the subproject, project implementation cycle, and project benefits as well as adverse impacts envisaged during project preparation, environmental and social safeguards, gender inclusion, community participation aspects built into the subproject, and understand their views and concerns.
- 33. At this PPTA stage, disclosure activities include dissemination/distribution of summary of resettlement framework and draft resettlement plan in local language to key stakeholders including temporarily affected persons. The approved resettlement framework/resettlement plan will also be disclosed on ADB, PMU, and TCMC websites and will be available in key ULB offices. During the subproject implementation, construction schedules will be informed to all residents including temporarily affected persons prior to the commencement of pipe laying through signboards. The signboards will be in local language and will include: (i) affected sections, (ii) start and end dates, (iii) information on traffic diversion and rerouting if any, and (iv) contact information for complaints/grievances. Table 11 depicts brief of consultation and disclosure activities carried out at this stage. A summary of all FGD and consultations held at various WSIS locations is provided in Appendix 8.
- 34. In some identified WSIS locations where specific impact issues were observed FGD and consultation were held during transect walks. These locations are near CPRs and at parking sites of commercial vehicles. The issues and mitigation measures which were the outcome of the discussions are presented in Table 11.
- 35. Detailed site-specific consultations were held dealing with particular issues of landowners who sold their land parcels for construction of WTP at Annur ridge and with community and users

of burial ground at Noyyal where OHT is proposed to be constructed. Brief note on consultation held with Noyyal burial ground users is presented in Table 10. Minutes of meeting are also appended (Appendix 9 and 9a).

36. For construction of WTP and access road at Oddarpalayan near Annur ridge, TEA purchased a total of 6.82 acres of land through negotiated settlement from eight landowners. All landowners, except one, are living near the proposed site and cultivate the land, a portion of which has been obtained for WTP. Discussions with the landowners revealed that, land price was negotiated according to market guidance value and they are satisfied with the settled price. They did not have any objection to part with their land parcels. The remaining portions of the affected plots of land are under cultivation. None of the landowners are vulnerable. The landowners have requested to be allowed to use backwash/surplus water from the WTP for irrigating their land. All the cost of irrigation pipelines will be borne by the cultivators. During consultations, they expressed that they would like TCMC to allow them to use surplus water for agriculture. Their request has been placed before Tiruppur City Engineer's Office for consideration. TCMC will need to look into technical feasibility of the proposal. Minutes of the meeting held with the landowners are appended (Appendix 10 and 10a).

Table 11: Consultations Held with Common Property Resource Users/Commercial Vehicle Operators

Location/WSIS Location/WSIS				
SI. No.	Component	Participants/ Date of consultation	Major Issues Raised	Mitigation measures discussed
1	Venkateswara Temple - raw water transmission mains at Mettupalayam near railway crossing	Total–7, Male–6, Female–1 Temple committee members, survey team, TCMC Engineer, Engineer from Mettupalayam Temple Date:16 July 2018	Passing of bulk water pipeline through underground tunnel Obstruction of access to temple Mitigation measures construction Blockage of access to temple for the worshippers	1. The temple users raised issue of blockage of access to the temple, especially during festival days. On occasions there are a larger number of devotees than usual. Traffic management becomes an issue. If construction work continues on those days, it will be difficult for people to assemble. 2. People will refuse to allow pipeline laying and want detailed discussion with PIU before construction. 3. TCMC engineers explained to the people and priest about adopting modern construction technique to complete work within minimum time, and that people/devotees will be informed in advance - at least 7 working days before - about work schedule. Contractor will provide alternate access to the temple users.
2.	Noyyal burial ground, OHT site	Total–17, Male–15, Female–2, local councillor, local residents, TCMC engineer, guard of the burial ground, a few graveyard users Date: 17 July 2018	 Storage of clear water within graveyard complex Maintenance of the OHT Running of burial ground Obstruction in entering graveyard with dead body 5.Water supply is very poor – once a week for 2–3 hours People want treated and regular water supply	The burial ground is presently in operation. Although construction of proposed OHT is accepted by the users, common passage for burial ground and water reservoir has raised issue of obstruction in using the public utility. Land required for proposed OHT is 0.11 acre and an open area of 0.27 acre is available near the common entrance. After discussion, the following mitigation measures were thought of which will ease entry of the graveyard users and construction and maintenance of OHT without damaging existing graveyard. There would be no damage to any structures including the graves. (i) Actual graveyard complex starts about 20 ft away from the selected site for OHT. (ii) A separate entrance gate away from proposed OHT site can be built.

SI. No.	Location/WSIS Component	Participants/ Date of consultation	Major Issues Raised	Mitigation measures discussed
SI. NO.	Component	Date: 25 November 2018	Major issues Raiseu	(iii) A wall around the boundary of the graveyard to separate OHT from graveyard can allow graveyard users enter the complex. (iv) A separate gate for OHT other than that of existing entrance gate for burial site (v) There is no issue in establishing OHT within burial ground complex, as long as it is surrounded with wall/fence. (vi) Operation and maintenance work can also be done without any opposition from surrounding community that uses the burial ground. (vii) The TCMC engineers present during discussion assured that it would be discussed with the higher authority for construction of a boundary and separate entrance gate (viii) The community was satisfied with the proposal. (ix) Minutes of meeting held with community is annexed (Appendix 9 and 10).
3.	Commercial vehicle parking near treated water distribution mains at Annur highway crossing	Total–5 Male–5 Truck drivers and the survey team. Date: 16 July 2018	Pipeline laying/excavation Parking of commercial vehicles Traffic diversion Alternate parking space	1. These commercial vehicles ply across the state, from Ooty, Chennai and Coonoor etc for carrying consumables – like vegetables, spices, food grains, etc. They are not required to pay any parking fees here. 2. Truckers wanted to know if temporary parking place, with charges will be provided. If so, they are willing to pay rent for parking. 3. There is a marshy land and embankment behind the road, where trucks can be parked with permission from administration. 4. The government bus terminus does not allow parking of private commercial vehicles inside. 5. They stay for a few days in the available parking space for unloading of consumables/any repair work of the vehicles and move away.

SI. No.	Location/WSIS Component	Participants/ Date of consultation	Major Issues Raised	Mitigation measures discussed
				6. They assured that no economic loss
				will occur even if they are not allowed to
				park. They are willing to make adjustments
				related to parking in keeping with
				construction schedule.

ft= feet, OHT= overhead tanks, PPTA= project preparation technical assistance, TCMC= Tiruppur City Municipal Corporation.

- 37. The process of continued consultation from project preparation to implementation and monitoring phase with the beneficiaries, affected persons, and other stakeholders was explained to the stakeholders. A city-wide stakeholder consultation is proposed for dissemination of project related technical and other information to stakeholders or their key representatives at one platform and disclosure of summary of social safeguards documents in local languages. These activities will be organised by PIU's social safeguards officer and supported by CMSC and sustained throughout the project implementation stage. It was also made clear that all these consultations will be documented with written records and minutes of meetings and people's views noted and included in the periodic monitoring reports. These reports will be further uploaded in PMU/city corporation and ADB websites for public disclosure.
- 38. If required, a revised resettlement plan will be prepared based on final alignment design and DMS and census carried out for involuntary resettlement impact. PIU will be responsible for issuing various required public notices prior to the survey and disclosure of updated resettlement plan. For temporary impacts, the dates of socioeconomic surveys will be considered as cut-off date. A few days prior to start of impact assessment survey the potentially affected persons will be intimated through CMSC/PIU and also by posting printed notices in common public advertisement places. Similarly, list of identified affected persons will be published at common places with contact details of CMSC/PIU officials. The list will be put up in separate areas/locations where impact is identified and simultaneously for all areas. This will avoid affected persons moving into other areas and identify any duplication of affected persons. CMSC/PIU will facilitate affected persons to approach lists in their area and get confirmation on any duplication, missing/absent affected persons.
- 39. In addition, draft and final resettlement plan, resettlement framework will be available for consultation in PIU/PMU offices, TCMC, PMU/PIU, and ADB website. Besides, subproject information details will be disseminated through leaflets and public announcements and notices. The subproject leaflets will be distributed by CMSC/PIU to the affected persons / communities for their information. A sample project information disclosure leaflet is attached in Appendix 11.

Table 12: Summary Consultation and Disclosure Carried Out During Project Preparation Technical Assistance Stage

SI No.	Activities	Details of Field Visits/Survey/Meetings/ Consultation Held	Participants/ Responsible Agency
1	Preliminary awareness about project design and scope of resettlement activities	Introductory meeting/discussion with Director and Environment and Social Safeguards Officers of TNUIFSL, Tiruppur City Engineer and his officers, PPTA technical consultant. Initial site visit to assess involuntary resettlement impact in association with city engineering team	PPTA consultant, TNUIFSL team, TCMC technical team responsible for subproject
2	Transect walks along WSIS components of TCMC, site visits to all WSIS components	Transect walks conducted along WSIS subproject components, screening of project impact to identify potential affected persons due to involuntary resettlement impact for the subproject	PPTA consultant, TCMC engineers

SI	Activities	Details of Field Visits/Survey/Meetings/	Participants/
No.		Consultation Held	Responsible Agency
3	Stakeholder consultations at several WSIS locations	Assessment of people's perception of project benefits and impact, present water supply situation, and requirement of quality drinking water supply. During the consultation, disclosure of subproject design, alignment, OHT locations, potential impact, safety measures, relevant resettlement policy of ADB, Resettlement Framework, disclosure and GRM and other relevant safeguards measures was made. Plan for future consultation during implementation stage was also explained.	PPTA consultant, TCMC engineers, potential affected persons, local residents, shop/stall owners, vendors

ADB= Asian Development Bank, GRM= grievance redress mechanism, OHT= overhead tank, PPTA= project preparatory technical assistance, TCMC= Tiruppur City Municipal Corporation, TNUIFSL= Tamil Nadu Urban Infrastructure Financial Services Ltd., WSIS= water supply improvement scheme.

V. GRIEVANCE REDRESS MECHANISM

- 40. Redressing grievances of the affected persons is a critical activity in any development work, particularly in respect of addressing involuntary resettlement impact either permanent or temporary in nature. This is particularly important when compensation and assistance payment to mitigate adverse impact to the affected persons is concerned. To complete payment disbursement prior to construction work commences is a precondition to clear the site free from encumbrances before handing over to the contractor.
- 41. A grievance redress mechanism (GRM) provides an accessible, inclusive, gender-sensitive and culturally appropriate platform for receiving and facilitating resolution of affected person's grievances related to the project. It aims to provide a time-bound and transparent mechanism to resolve any adverse impact linked to the project. A grievance redress cell (GRC) will be established in Tiruppur city for the WSIS subproject to receive, evaluate and expedite solutions for the concerns, complaints and grievances of the affected people in relation to the project's implementation. It will be regarded as an accessible and trusted platform for receiving and facilitating project related complaints and grievances. The multi-tier GRM for the program will have realistic time schedules and responsible persons dedicated to the cause to address grievances.
- 42. The GRM will be developed in consultation with stakeholders. Public awareness campaign will be conducted to ensure that awareness on the subproject components and its grievance redress procedures is generated among the affected persons in particular and the public in general. It will be created through Public Awareness Campaign with the help of print and electronic media and radio. The campaign will ensure that the affected people gain the knowledge of grievance redress procedures and entitlements and eligibility for compensation and assistance as per entitlement matrix mentioned in the resettlement framework prepared for TNUFIP. PMU) and concerned PIU will ensure that their grievances are received and addressed.
- 43. **All grievances.** major or minor, will be registered. Documentation of grievance redress application includes: the name, address and contact details of the complainant with, nature of the complaint, date of receipt of the complaint, place of problem area, and grievance resolve modality. PIU will also be responsible for follow-through for each grievance, information dissemination to complainants on the status of their grievance and recording their feedback (satisfaction/dissatisfaction and suggestions) for inclusion in the monitoring report.

- 44. **Grievance Redress Cell.** will meet every month (if there are pending, registered grievances), determine the merit of each grievance, and resolve grievances within specified time and failing grievance resolve at GRC level, those will be addressed by the state-level steering committee. The steering committee will resolve the escalated/unresolved grievances.
- 45. **Areas of Jurisdiction.** The areas of jurisdiction of the GRC will be the specific locations or sites where subproject components are proposed and/or their surrounding areas. The steering committee will have jurisdictional authority across the state.
- 46. **Composition of Grievance Redress Committee.** GRC will be headed by the district collector, and composed of members including PIU head, safeguards officer of PIU, representative of TCMC, one elected representative/respected citizen from the area, and a representative of affected community. There should be at least one women member.
- 47. **State Level Steering Committee.** will include commissioner of Municipal Administration as chair, with members comprising managing directors of TNUIFSL, CMWSSB, TWAD Board and others as applicable.
- 48. **Methods of Registering Grievances.** There will be multiple means of registering grievances and complaints by dropping grievance forms in complaint/suggestion boxes at accessible locations, or through telephone hotlines, email, post or writing in a complaint registrar book in TCMC's project office. There will be a complaint registrar book and complaint boxes at the construction site office to enable quick response and amicable solution of grievances/complaints at site. All relevant information of the complaint/grievance will be documented at site register book and receipt of complaint provided. Program management unit (PMU's) social development officer/resettlement officer will be responsible for documentation, registration of complaints, and timely resolution of the social issues.
- 49. There will be several tiers for grievance redress process. The multi-tier GRM for the project as outlined below (Figure 1) shows each tier having time-bound schedules with responsible persons identified to address grievances and seek advice of appropriate authority at each stage, if required. The GRC will continue to function throughout the project duration.
- 50. **First Level Grievance Redress.** The CMSC personnel and PIU's supervision personnel will be responsible to immediately resolve issues in-site at ward/field level in consultation with the complainant within 3 days of receipt of a complaint/grievance.
- 51. **Second Level Grievance Redress.** The grievances failing to be resolved at first tier, within 3 days will be brought to the notice of PIU SSO for redressing grievance complaints that are not resolved. PIU will take necessary measures to address the grievances within 7 days of receipt of compliance/grievance in discussion with the CMSC and the contractor. PIU SSO will be supported by the CMSC's social & resettlement expert (SRSE) at this stage.
- 52. **Third Level Grievance Redress.** All the grievances that have failed to be redressed by PIU will be brought to the notice of the Town Level Committee (TLC), of which Tiruppur City commissioner will be the chairperson, who will be assisted by the concerned city level engineers. TLC will meet periodically as found appropriate and determine the merit of each grievance placed before the committee. The PIU SSO will be responsible to carry out the process of redressal of each grievance. The TLC will resolve the grievance within 15 days of receiving the complaint.

- 53. **Fourth Level Grievance Redress.** All grievances that are not addressed by the TLC within 15 days, and which require the district collector's intervention, will be forwarded to the district level Grievance Redress Committee (GRC). The district level GRC will be presided by the district collector, other members being PIU head as convener, environment and social safeguards officers of the PIU, representative of Tamil Nadu Pollution Control Board (TNPCB), one elected representative preferably from subproject impact area, one well known and respected person/member of the community, and a representative of affected persons/community as members. At least one member of the GRC will be a woman. The GRC will resolve the grievance within 30 days of registration with it.
- 54. **Fifth Level Grievance Redress.** Any grievance that remains unresolved by the GRC will be sent to the state level steering committee.
- 55. The project GRM notwithstanding, an aggrieved person shall have access to the country's legal system at any stage and accessing the country's legal system can run parallel to accessing the GRM and is not dependent on the negative outcome of the GRM. In case of grievance related to land acquisition, resettlement and rehabilitation, the affected persons will have to approach a legal body/court specially proposed under Right to Fair Compensation and Transparency in Land Acquisition (RFCTLARR), 2013;⁹ Land Acquisition, Rehabilitation and Resettlement Authority (LARRA).
- 56. **ADB Accountability Mechanism.** In the event of failure to resolve grievances/complaints at the project specific GRM level, the affected person also can access the ADB Accountability Mechanism through directly contacting (in writing) the complaint receiving officer at ADB headquarters or the ADB India Resident Mission. Before submitting a complaint to the Accountability Mechanism, it is necessary that affected person make a good faith effort to solve the problem by working with the concerned ADB operations department and/or the resident mission. Only if they are still dissatisfied, ADB Accountability Mechanism will consider the compliant eligible for review. The complaint can be submitted in any of the official languages of ADB's developing member countries. The ADB Accountability Mechanism information will be included in the project information disclosure leaflet for distribution to the affected communities, as part of the GRM.
- 57. **Record Keeping.** Records of all grievances received, containing contact details of complainant, date the complaint, nature of grievance, agreed corrective actions, the date of effectiveness and final outcome of grievance redress measures will be preserved by PIU and submitted to PMU. CMSC will support PIU in this effort.
- 58. Information Dissemination Methods of the Grievance Redress Mechanism. The PIU, assisted by CMSC, will be responsible for information dissemination to affected persons and general public in the project area on grievance redress mechanism. Public awareness campaign will be conducted to ensure that awareness on the project and its grievance redress procedures is generated. The campaign will ensure that the poor, vulnerable, and others are made aware of grievance redress procedures and entitlements per this temporary resettlement framework including contact details of officials/members of GRC, where/how to register grievance, various stages of grievance redress process, time likely to be taken for redress of minor and major grievances, etc. Documentation of all grievances that are received and responses provided will be made and reported back to the affected persons. The number of grievances recorded and

⁹ The Authority admits grievance only with reference to the land acquisition and R&R issues under the RFCTLARR, 2013.

resolved, and the outcomes of grievance redress will be displayed/disclosed in the PIU offices, Tiruppur City Municipal Corporation (TCMC) notice boards and on the web, as well as reported in the semi-annual environmental and social monitoring reports to be submitted to ADB. A sample draft grievance registration form is annexed as Appendix 12.

- 59. **Periodic review and documentation of lessons learned.** The PMU will periodically review the functioning of the GRM and record information on the effectiveness of the mechanism, especially on the PIU's ability to prevent and address grievances.
- 60. **Costs.** All costs involved in resolving the complaints (meetings, consultations, communication and reporting/information dissemination) will be borne by the respective PIU.

VI. LEGAL FRAMEWORK

- 61. The policy framework and entitlements for the TNUFIP are based on:
 - (i) The Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act (RFCT in LARR), 2013 and RFCTLARR GOTN Notified Rules, 2017;
 - (ii) Environmental and Social Management Framework (ESMF) of TNUIFSL;
 - (iii) ADB's Safeguard Policy Statement (SPS), 2009; and

- (iv) The agreed entitlement matrix and Resettlement Framework.
- 62. The salient features of the government and ADB polices are summarized below. The resettlement principles and procedures to be followed for social safeguards under TNUFIP are detailed out in the resettlement framework document. In case of discrepancy between the policies of ADB and the government act and policy, gap-filling measures will be adopted to bridge the discrepancies. Core involuntary resettlement principles for the TNUFIP to be followed for each subproject are:
 - (i) Screening of the project to identify involuntary resettlement impacts and risks. Minimizing and avoiding land acquisition and resettlement impacts of each subproject by exploring all viable alternative designs;
 - (ii) Where unavoidable, time-bound resettlement plans will be prepared and affected persons will be assisted in improving or at least regaining their pre-program standard of living;
 - (iii) Full information disclosure and close consultations with affected persons including information on compensation, resettlement options, and participation of affected persons in planning and implementing sub-projects will be ensured. The draft resettlement plan, including documentation of the consultation process will be disclosed to the affected persons and other stakeholders. The final resettlement plan and other documents such as the monitoring reports will be revealed to affected persons and other stakeholders;
 - (iv) Where the resettlement impacts are unavoidable, the displaced persons should be assisted in improving or at least regaining their standard of living;
 - (v) Vulnerable groups, including below poverty line households, female-headed households, disabled persons, elderly, women and children, landless, non-titled households with no tenure security, and scheduled castes and scheduled tribes will be given special assistance;
 - (vi) Payment of compensation to affected persons including non-titled persons (e.g., informal dwellers/squatters, and encroachers) for acquired assets at replacement cost:
 - (vii) Payment of compensation and resettlement assistance prior to the contractor taking physical possession of the land and prior to the commencement of any construction activities: and
 - (viii) Provision of income restoration and rehabilitation; and establishment of appropriate grievance redress mechanisms.
- 63. A detailed description of each compensation measure and assistance is provided in the entitlement matrix attached in resettlement framework while a Tiruppur subproject specific/applicable entitlement matrix is given in Table 13 Affected persons will be entitled to a combination of compensation measures and resettlement assistance, depending on the nature of ownership rights of lost assets and scope of the impact, including social and economic vulnerability of the affected persons.
- 64. Livelihood impacts identified for Tiruppur subproject WSIS components are temporary ranging from 20–30 days of construction time for each section of construction of about 100–150 m. Pipelines will be laid along state highways, MDR and rural roads. Trenches for pipelines will be excavated on both sides of the road where road width is more than 40 ft, and where it is less than 40 ft, trenches will be laid along one side of the road only. Along narrow roads, impacts may be possible to avoid, as water pipelines network will be laid in the middle of the road. Impacts will be further avoided/minimized by constructing trenches just between the

black top edge and property line or the existing drain. Access to roadside houses, shops will be ensured by the contractor. Prior to implementation, DMS will be undertaken to further assess resettlement impact. At that time, if additional affected persons are identified at any location (e.g. vegetable market, car parking), an alternate place in the vicinity will also be earmarked for the shop owners/vendors to continue with their livelihood activities.

65. Majority of potentially affected persons use movable stalls that can be shifted to nearby locations. Advance notice of minimum 7 working days regarding commencement of construction activities, duration of work and type of disruption will be given to temporarily affected persons once contractor's work plans are finalized. If required, they will also be assisted to shift temporarily to an alternate place for continued economic activity. For example, they will be assisted to shift to the other side of the road or nearby areas where there is no construction. Ensuring there is no income loss or access disruption during sub-project construction is the responsibility of contractors.

VII. ENTITLEMENT, ASSISTANCE AND BENEFITS

- 66. Socio-economic survey was conducted to assess potential involuntary resettlement impact during transect walks along all WSIS components. No involuntary land acquisition is proposed, and no permanent involuntary resettlement impact is anticipated. Nevertheless, some temporary impacts could be identified, like shops/stalls and kiosks which will lose livelihood and income from business for a period of about 20–25 days during construction and pipe laying. The mobile vendors can be shifted to opposite side of roads, and no income loss is foreseen. At some market locations, parked commercial vehicles will incur temporary disruption to access to parking space. Parking for these commercial vehicles can be arranged at an alternate place temporarily for the period of construction in that stretch and traffic diversion/re-routing can be done at critical places. Three CPRs are identified as affected. One of these a burial ground, will also need a separate entrance as one OHT is proposed to be built within the compound of this public utility.
- 67. The agreed resettlement framework for TNUFIP requires assistance for temporary loss of income which will be provided to the shops/stalls/kiosks for required number of days as per the entitlement matrix. The assistance will be provided after DMS is conducted and final design alignments are known. The vendors with moveable carts/merchandise spread on roadside will be assisted to shift to opposite side of the road or any other nearby locations to enable them to continue their business. Roadside residents will be provided with alternate safe access temporarily till excavation is complete, and trenches are properly filled up and road surface put back into original condition.
- 68. Some measures will be taken to minimize temporary impact on access and livelihood. These are:
 - (i) Advance notice of at least 7 working days prior to construction/laying of pipelines will be given to the hawkers/ mobile vendors/stationary vendors/parked vehicles to prepare them for temporary shifting once contractor's work plan is finalized;
 - (ii) Contractor's action plan will include measure to avoid/minimize loss of income, livelihood, restricted access. These include: maintain access to residences/shops by metal planks across open trenches, leaving spaces between mounds of soils for access, increased workforce to accelerate work in areas with impediment to access, carry out work in early hours of day/middle of night as much as possible, timing of work to avoid peak business hours, etc.

- (iii) The Contractor's action plan will include coordination of works with the UGSS contractor(s) for Mangalam Road, where water supply pipeline crosses the sewerage line, to ensure that disturbance to be public is minimised,
- (iv) Assistance to mobile vendors/stationary vendors to shift to other side of the road and elsewhere for continued economic activities without loss of income;
- (v) Assistance to be paid to those shop/stall owners incurring loss of livelihood and income prior to commencement of construction; and
- (vi) Census and DMS survey will be organised to determine final resettlement impact when final alignment is known and approved by PIU/PMU/CMSC.

Table 13: Entitlement Matrix

SI No.	Impact Category	Entitlements	Explanations				
I. Impa	I. Impacts to Community Assets						
A	Community Assets	Wherever possible the community assets will be relocated/restored in consultation with community. When the relocation/restoration of the community assets are not feasible, they will be replaced/provided afresh.	-				
II. Unfo	reseen Impacts						
A	Unforeseen Impacts	ts Unforeseen impacts encountered during implementation will be addressed in accordance with the principles of this resettlement framework.					
III. Ten	III. Temporary Economic Impacts during implementation						
A	Temporary economic Impacts	Compensation for loss of income for the duration of impact based on net income worked out as per IT returns or based on notified minimum wage rates, whichever is higher.	Advance notice provided to temporarily affected persons once contractor's work plans are finalized, with minimum 7 working days				

VIII. RESETTLEMENT BUDGET AND FINANCING PLAN

69. WSIS subproject is estimated at a lump sum cost of ₹1,086,332 or \$15,607. The costs are indicative estimates and will be confirmed post DMS based on detailed design prior to commencement of construction. The cost also comprises GRM and public consultation costs. Resettlement plan costs will be confirmed during detailed project preparation/implementation. Resettlement plan costs will be confirmed during detailed project preparation/implementation.

Table 14: Resettlement Budget

Sub-	total ingency @ 10%				₹ 9,87,575.00 ₹ 98,757.00
	d Total (₹)				₹ 1,086,332.00
		@	1 \$= ₹69.6025		\$ 15,607.00

- ^a Government of Tamil Nadu, Labour and Employment Department. 2017. *Government Order (2D) No. 62 dated 11 October 2017. Minimum Wages Act, 1948 (Central Act XI of 1948): Revision of minimum rates of wages for employment under any local authority Orders Issued.* Chennai
- ^b For the purpose of budget preparation in the draft resettlement plan, notified minimum wage rate is used, as per the entitlement matrix. Costs in the updated resettlement plan will be based on a comparison of census and socio-economic survey data on income with the prevailing notified minimum wage rate at the time of compensation payment and the higher of the two will be used for the period of disruption.
- ^c Construction for gate and boundary wall inside burial ground -will be done by the Contractor and the work is within scope of civil work of the Contractor.
- d DMS will be undertaken before start of construction based on detailed design and to confirm resettlement impact and update resettlement plan.
- ^e Disclosure cost will include translation of resettlement plan and resettlement framework in local language.
- f Third party certification will be required to validate land donation.

Source: Field survey in July-August 2018.

70. All land acquisition and resettlement costs will be borne by the government/TCMC/PIU. Under TNUFIP, it is suggested that payment will be directly made by PIU to affected persons. The SRSE of CMSC and PIU ASO and will be involved in facilitating the disbursement process including opening bank accounts for the affected persons (both permanent and temporary loses) who do not have bank accounts as yet.

IX. INSTITUTIONAL ARRANGEMENT AND IMPLEMENTATION SCHEDULE

71. The Municipal Administration and Water Supply Department (MAWS), Government of Tamil Nadu (GOTN) working through the Tamil Nadu Urban Infrastructure Financial Services Limited (TNUIFSL) will be the state-level executing agency. A program steering committee, headed by principal secretary, MAWS, GOTN, will provide overall guidance and strategic directions to the program. The PMU for TNUFIP, will be established within TNUIFSL and the managing director, TNUIFSL will act as program director for overall management, planning, implementation, monitoring, reporting, and coordinating with TNUFIP. The Commissioner of Municipal Administration will act as the deputy program director in the PMU. The concerned Urban local body, in this case, TCMC, represented by Municipal Commissioner, Tiruppur City, will be the implementing agency for works in the TCMC WSIS subproject. The implementing agency will

establish PIUs headed by a superintending engineer as full-time project manager. PIUs will be responsible for overseeing implementation of the various projects on a day-to-day basis. ULBs under the program with less project implementation capacity, may utilize implementation support from the Tamil Nadu Water Supply and Drainage Board (TWADB) to act as PIU. The project managers of the PIUs (established at TCMC) will be supported by technical, financial, safeguards, and administrative staff from a CMSC recruited by TNUIFSL. For the capacity development and incentivized reforms components, CMA acting through its commissioner, will be responsible for carrying out these activities and establish a PIU.

- 72. A program steering committee will be formed, headed by principal secretary, MAWS, and members comprising of: (i) Managing Director, TNUIFSL (convener); (ii) CMA; (iii) Managing Director, CMWSSB; (iv) Managing Director, TWADB; and (v) Managing Director, Tamil Nadu Urban Finance and Infrastructure Development Corporation (TUFIDCO).
- 73. **Program Management Unit**: PMU will be responsible for overall monitoring of the subproject and ensure adoption and compliance of Program resettlement framework for the and policy principle of ADB SPS 2009. PMU will monitor PIUs for: (i) identifying and preparing subprojects, (ii) reviewing resettlement plans prepared by PIU/ULB, (iii) ensure adoption and compliance of resettlement framework in land acquisition and social safeguards, (iv) directing awareness campaigns and participation programs for governance improvement, (v) organize and operate the program performance monitoring system, (vi) prepare and submit monitoring reports to ADB periodically, and (vii) design and organize capacity building programs. PMU will be assisted by CMSC in managing and guiding the overall implementation of the program. PMU SRO will be responsible for supervising all land acquisition and resettlement matters.
- 74. PMU's program safeguards officer (PSO) will undertake following responsibilities: (i) addressing all social safeguards issues, (ii) implementing the resettlement plan based on program resettlement framework, (iii) report to PIU Head issues related to land acquisition and resettlement plan implementation in the sub=projects, (iv) monitoring physical and financial progress on land acquisition and other resettlement activities and updating the PMU on the same, (v) monitoring implementation of resettlement plans, (vi) guiding the PIUs as and when necessary, and (vii) endorsing and submitting periodic monitoring reports prepared by PIU.
- 75. **Program Implementation Unit**: One PIU will be established at New Tiruppur Area Development Corporation Limited (NTADCL) for undertaking day to day implementation and monitoring of WSIS subproject. Social safeguards officer (SSO) of PIU will implement the resettlement plan at the PIU level and will undertake internal monitoring and supervision throughout the project period. PIU's activities will include: (i) appraising the contractors on safeguards requirements including disclosure of subproject information and GRM; (ii) implementing and monitoring safeguards compliance activities, public relations activities, gender mainstreaming activities, and community participation activities; (iii) coordinating with district and city corporation administration for land acquisition and resettlement and rehabilitation (R&R) aspects and addressing any problems and/or delays; (iv) monitoring physical and financial progress on land acquisition, if required and safeguards activities; (v) organizing monthly meetings with the PMU to review the progress on R&R; and (vi) share all reports relating to land acquisition, alienation, R&R activities, safeguards mitigation measures, report to PMU on status of resettlement plan progress.
- 76. **Construction, Management, and Supervision Consultant**: The implementing agency will be assisted by CMSC. In social safeguards and resettlement plan implementation issues, the SRSE of CMSC will perform a key role. The activities of SRSE will be: (i) to carry out census and

socio-economic surveys/verification surveys for the affected people and update resettlement plan in line with the TNUFIP resettlement framework based on final designs as per DMS; (ii) identify requirement for any enter upon permissions (EUPs)/no objection certificates (NOCs) for subproject sites and assist PIUs in obtaining the same prior to start of civil works; (iii) prepare any additional safeguard documentation, if required, such as due diligence reports, updated resettlement plan; (iv) assist PIU in day-to-day implementation of resettlement plan activities and ensure contractors comply with conditions of resettlement framework/resettlement plan safety measures; (v) take proactive action to anticipate and avoid delays in implementation, and ensure gender equality and social inclusion during implementation; (vi) assist PIU in conducting public consultation and disclosure activities; (vii) assist PIU in preparing periodic social safeguard monitoring reports as per project administration manual requirements; (viii) assist PIU in establishing benefit monitoring & evaluation (BME) indicators and performance system under guidance of GIAC, with focus on gender and vulnerable households, to undertake and monitor GRM activities; (ix) support GIAC in conducting training on involuntary resettlement safeguards implementation capacity of the PIUs; and (x) assist PIU/PMU in any other social safeguard tasks.

- 77. **Governance Improvement and Awareness Consultants:** GIAC will be engaged to provide improved governance and implementation performance. The scope of service will include, but not limited to, implementation, monitoring and reporting of the community consultation and participation plan (CCPP); gender equality and social inclusion (GESI) action plan and monitor and guide resettlement plan implementation and provide training to PIUs/PMU officers on involuntary resettlement planning and implementation. Specific tasks related to social safeguards include: (i) monitor and guide PIUs on resettlement plan implementation, especially for significant permanent impacts; (ii) lead involuntary resettlement training and capacity building on involuntary resettlement/IP safeguards to project PIUs and CMA; (iii) guide PIUs to set up grievance redress mechanisms, record keeping and feedback mechanisms; and (iv) guide PIUs in keeping detailed records of progress, addressing grievances and establishing monitoring and reporting systems for resettlement plan. GIAC will also provide guidance to PIUs on specific requirements for indigenous people plan (IPP) implementation, if indigenous people's safeguard is triggered.
- 78. Following Table 15 indicates training requirement to improve capacity for resettlement plan preparation and implementation for PMU/PIUs. Training cost will be borne by PMU and included in to project cost. Training modules will be prepared after ascertaining capability of target personnel.

Table 15: Training Needs Assessment

SI		
No.	Training topics	Target Participants
1	Sensitization and Awareness to social safeguards	All staff, consultants, Contractor's staff involved in
	issues:	subproject
	(i) ADB's SPS	PIU, PMU staff at TNUIFSL
	(ii) GOI and GOTN's land acquisition and R&R policy, applicable social & resettlement acts	Once in first year for 1 day and then refresher course on succeeding year
	(iii) Incorporation of social/resettlement components in project design & contracts	Duration: 1-day workshop
	(iv) Monitoring, reporting, corrective and mitigative activities	

2	Resettlement plan implementation:	All staff of PIU, consultants, involved in subproject
	(i) Roles and responsibilities of PIU/PMU	 2 days for each session and twice during
	(ii) Resettlement plan components and stages in	implementation within a period of 2 years.
	implementation	
	(iii) Resettlement plan activities in matching timeline with	
	construction schedules and timelines	
	(iv) Public relations & consultations	
	(v) Grievance redress mechanism	
	(vi) Monitoring and corrective action planning	
	(vii) Documentation, Disclosure & reporting	
3	Experiences and best practices sharing:	All staff of PIU, consultants, contractor's staff involved
	(i) Experiences on resettlement plan implementation	in subproject
	(ii) Issues and challenges	Duration: 1-day workshop
	(iii) Best practices revealed to be followed	

SPS= Safeguards Policy Statement, GOI= Government of India, GOTN= Government of Tamil Nadu, R&R= resettlement and rehabilitation, PIU= program implementation unit, PMU= program management unit, TNUIFSL= Tamil Nadu Urban Infrastructure Financial Services Ltd.

79. Table 16 provides suggested roles and responsibilities of various organisations involved in resettlement plan implementation of TNUFIP.

Table 16: Institutional Roles and Responsibilities

Activity	Responsible Agency
Subproject Initiation Stage	
Finalization of sites, alignment roads for sub-projects	PIU/ TCMC
Disclosure of proposed resettlement plan and subproject details by Public Notice	PIU/ TCMC
Meetings at community/household level with affected persons	PIU/CMSC
Resettlement Plan Preparation and Updating Stage	
Conducting Census of all affected persons	PIU/ CMSC
Conducting FGDs/public consultation meetings/workshops	PIU/CMSC
•	PIU/ CMSC
Computation of replacement values of land/properties and other assets for proposed	As per RFCTLARR Act
acquisition and calculation of assistance for temporarily affected persons	2013
Categorization of affected persons for finalizing entitlements	PIU/ CMSC
Calculating compensation and rehabilitation measures	PIU/ CMSC
Conducting discussions/meetings/workshops with affected persons	
and other stakeholders	PIU/ CMSC
	PIU/CMSC as per
Fixing compensation for land/property with titleholders	RFCTLARR Act 2013
Finalizing entitlements and rehabilitation packages	PIU/ CMSC
Disclosure of resettlement plan	PIU/ CMSC
Approval of resettlement plan	PMU/ ADB
Sale deed execution and payment	PIU/ TCMC
Taking possession of land	PIU/ TCMC
Resettlement Plan Implementation Stage	
Implementation of proposed rehabilitation measures	PIU/ TCMC/ CMSC
Consultations with affected persons during rehabilitation activities	PIU/ TCMC/ CMSC
Grievances redressal	PIU/ GRC/ PMU/ CMSC
Internal monitoring	PMU / PIU

ADB= Asian Development bank, CMSC= construction, management, and supervision consultant, FGD= focus group discussion, PIU= program implementation unit, PMU= program management unit, TCMC= Tiruppur City Municipal Corporation, RFCTLARR= Right to Fair Compensation and Transparency in Land Acquisition 2013.

X. RESETTLEMENT PLAN IMPLEMENTATION

80. All proposed WSIS subproject component sites will be secured prior to the contract award and start of civil works. Prior to contract award, for all TCMC/government lands, PIU will confirm that there is no land acquisition related legal issues pending to be resolved. This could be in the form of self-certification by the owner department/TCMC. Translated summary of land records will be added to the updated resettlement plan. The updated resettlement plan will be submitted to ADB through PMU prior to commencement of civil works. Resettlement plan will also be translated in English and summary disclosed in Tamil prior to contract award.

Table 17: Resettlement Plan Implementation Schedule

	2019	20	20	2021	2022	2023	2024
		H1	H2				
Setting up of PIU							
Appointment of GIAC consultants							
Setting up of project level GRM							
Awareness generation among affected persons on entitlements, impact avoidance and mitigation measures to be implemented by the contractor							
Conduct detailed measurement surveys, census surveys and issuance of ID cards in sections ready for construction							
Identify Vulnerable affected persons, if any*							
Update draft resettlement plan to reflect surveys, consultations, design							
changes, and due diligence results							
Consultations and disclosure							
Review and approval of updated Resettlement Plan (PMU and ADB)							
Training/capacity building of PMU and PIU safeguards officers, engineers and other staff, CMSC supervision staff and contractor's staff							
Payment of compensation							
Handover of sites and alignments to contractors							
Start of civil works							
Internal monitoring, including surveys of affected persons on entitlements, satisfaction surveys							
Repair/reconstruction of affected facilities, structures, utilities, if any					ely, in consul nts, as requir		other

ADB = Asian Development Bank, CMSC = construction, management, and supervision consultant, GIAC = government improvement and awareness consultant, GRM = grievance redress mechanism, PIU = program implementation unit, PMU = program management unit.

Note: The cut-off date for non-titleholders, is the date of the start of the census survey. The date of Land Acquisition Notification under Section 11 of the RFCTLARR Act, 2013 is the cut-off-date for titleholders losing land and structures, if any. Endorsement and disclosure of finalized resettlement plans consistent with the resettlement framework to be undertaken.

XI. MONITORING AND REPORTING

- 81. **Internal Monitoring**. Resettlement plan implementation will be closely monitored by the PMU. Monthly monitoring reports will be prepared by CMSC's social and SRSE under guidance from assistant safeguards officer (ASO) of PIU, who will be responsible for submitting reports to PMU. Initially, for one year, monitoring report will be made quarterly and later with progress of subproject, reporting frequency will be half-yearly. The SRSE will provide inputs by collecting necessary data, information on progress of resettlement plan implementation and safety measures taken for the project affected persons and road residents. The report will also include grievance redress feedback, any safety issues, potential problem areas and effectiveness of safety measures taken. Further details of the contents of the monitoring reports will follow guidelines in the resettlement framework prepared for the program.
- 82. Internal monitoring will be carried out throughout resettlement plan implementation and subproject implementation period. The reports will serve as base materials for overall monitoring report for TNUFIP will be generated every quarter for the first year of implementation and biannually thereafter.
- 83. End term Evaluation. After the completion of the Program, an end-term impact evaluation to assess the effectiveness of the implementation of the resettlement plan will be carried out. Tiruppur WSIS subproject will not trigger any potential permanent resettlement impact. Hence, the evaluation will focus mainly on effectiveness of resettlement measures taken to address temporary impact and how the SBEs have been able to adjust with the implementation plan to continue with their business and in case of any temporary loss of livelihood, and compensation payment for the period of disruption.

Note:

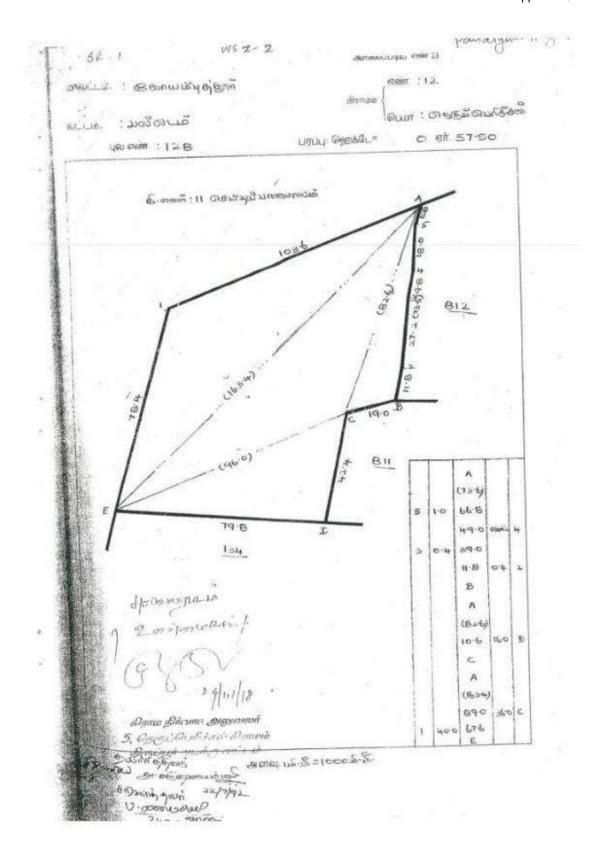

- 1. As per data published by the Planning Commission, Government of India, in 2011-2012, poverty line in urban Tamil Nadu was ₹993 per capita per month. On adjusting for inflation, this works out to ₹1,406 per capita per month in 2017-18 or a monthly household income of ₹5,540 for BPL households, considering the average urban household size in the state per Census 2011. None of the land sellers who were surveyed fall below poverty line. Consultations revealed that those who could not be surveyed (relatives of the land sellers who were consulted) are also not poor or vulnerable and have received payment for their share of land sold.
- 2. Several rounds of consultations with the landowners were conducted in June, July, September and November 2018 and despite prior notices, three persons could not be surveyed or consulted.

பதிவு அலுவனர் கையொப்பம்

- ் தசல் ஆவணத்தைத் திருப்பட் பெரும்போது உரிய நபரின் விரல் ரேகை பெறப்படுகிறதா என உறுதிசெய்து கொள்ளவம்.
- 2 ஆவணதாரர்கள் தூக்களின் சரியான சைபேலி எஸ்ஸைப் பதிவுக்கு தாக்கலாகும் ஆவணத்தில் தெரிவித்தால் ஆவணம்கொத்தின் நிலை குறித்த குறுஞ்செய்தியை பெறலாம்.
- ஐவுணத்தை குறிந்த காலத்தில் திரும்பப் பெற்றுக்கொள்ளத் தவறும் பட்சத்தில் பாதுகாப்பு கட்டணம் வதுலிக்கப்படும். 4. கிராமப்புறச் சொத்துக்களைப் பொறுத்து பட்டா மாற்றம் தேவைப்படும் ஆவணங்களுக்கு பட்டா மாற்றம் செய்யக் கோரும் படிவம் இவ்வலுவலகத்தில் இருந்து இணையதளம் வறியாகவே வருவாய்த்துறைக்கு அனுப்பட்டட்டுள்ளது. அதன் ஒப்புகைச் சீட்டை தங்களின் அசல் ஆவணத்தைத் திரும்பர் பெறும்போது கேட்டுப் பெற்றுக்கொள்ளவும்.

https://htmg/nat.gov.in aiditin இணைய களம் மூலம் வழங்கப்படும் சேவை கள்

- கட்டமையின்றி வில்லங்க விவரம் தரவிறக்கம் செய்யும் வசதி
- சார் பதிவாளர் அலுவலகம் நேரில் வராமல் இணைபதளம் மூலம் சான்றிட்ட நகல்கள் வில்லங்க சான்று விபரங்கள் வில்லனப்பித்து மில்ளஞ்சல் மூலம் சான்று பெரும் வசதி
- இணையதனம் மூலம் பொது மக்களே ஆணைம் உருவாக்கும் வசதி
- இணையதனம் மூலம் வழிகாட்டி மதிப்பை அறியும் வசதி, கட்டிட மதிப்பை கணக்கிடும் வசதி
- இணையதளர் மூலம் முத்திரைத் தீர்வை, பதிவுக் கட்டணம் உள்ளிட்ட கட்டணங்கள் செலுத்தும் வசதி
- பொதுமக்கள் நலன் சார்ந்த கற்றறிக்கைகள் அரசாணைகள் பதிவுத்துறையின் இணையதனத்தில் பார்வையிடும் வசதி.

கிரைய ஆவணம்

2018-ம் வருடம் அக்டோயர் மாதம் 8-ம் தேதி திருப்பூர் மாவட்டம், திருப்பூர்-641 607, கொக்குநகர், அப்பாச்சி நகர் மெயில் ரோடு, Plot No.62-ல் திருவப்பட்டிருக்கும் TEA FOUNDATION (PAN:AADTT0132D)-க்காக மேற்படி மானடோலில் தற்கால துணைதலைவரும், திருப்பூர் மாவட்டம், திருப்பூர்-641 604, காக்கோம் ரோடு, கதிர் நகர்: 11/5-நை முகவரியில் வசிக்கும், திரு.பழனிச்சாமி அவர்கள் குமாருமான திரு.முருகேசன் (ஆதார்:6290 8120 9750) மூலம் கேற்படி பவுண்டு சனுக்கு.

கோயம்புத்தூர் மாவட்டம், கோயம்புத்தூர்-641 011, சாய்பாபாகாலனி, 8வது குழுக்குதெரு, பாரதிபார்க், 54-நெ முகவரியில் வசிக்கும் திரு.A.M.துரைசமயி அவர்கள் குமாரர் திரு.D.ஜெயராஜ் (PAN:ACTPJ5242J) ஆகிய நான் எழுதிக்கொடுக்கும் கிரைய அதனைம் என்னவெளில்,

எனக்கு அன்னூர் சார்பதிவக 1-புத்தகம் 1108/2007, 1815/2007 மற்றும் 4332/2011-நம்பர்களாக பதிவு செய்யப்பட்டுள்ள கிரையப் பத்திரங்களின்படி கயார்ஜிதவகையில் பாத்தியப்பட்டதும், வருவாய் பதிவேடுகளில் எனது பெயருக்கு பட்டா யாறுகலாகி என் அனுபவ சுவாதீனத்தில் உள்ளதுமான இதன் கீழ்காணும் சொத்துக்களை வில்லக்க சுத்துமாய் நான் தங்களுக்கு கு.45,00,000/-க்கு விலைக்கிரையத்திற்கு கொடுத்து கிரையத் தொகையை பெற்றுக்கொண்டதற்கு லிபரம்:-

தாங்கள் கனரா வங்கி திருப்பூர் கிளையின் 06,10,2018-ம் தேதியிட்ட ரு.45,00,000/-க்கான 526472-நெ வரைவோலையை என்னிடம் ஒப்படைத்த வகையில் எனக்கு செல்லானது ரு.45,00,000/-

மேற்கண்ட முறையில் கிரையத் தொகை முழுவதும் எளக்கு செல்லாகிவிட்டபடியால் கிரையச் சொத்தையும் இன்றே நாக் தங்களின் நேரடி. சுவாதீனத்தில் ஒப்படைத்துவிட்டேன்.

இனி இன்று முதல் இக்கிரையச்சொத்துக்கு நீங்களே பூரண உரிமையாளராகி அரசு வரிகளை செலுத்திக்கொண்டு சர்வ சுதந்திரங்களுடன் கிரையங்களுக்கு உட்படுத்தி ஆண்டு அனுபவித்து சுகத்தில் இருக்கவும்.

இனி இக்கிரையச் சொத்தைப் பொருத்து எனக்காவதும் என்னை உள்ளிட்ட முன்பின் வாரிக்களுக்காவதும் எவ்வித பாத்திய சம்மந்தமும், பின் தொடர்ச்சியும் கிடையாது. கிரையச் சொத்தின் மீது எவ்வித வில்லக்க வியாஜ்ஜியங்களோ, தனிப்பட்ட அடமானம், Equitable Mortgage, பிராமிசரி நோட்டு, வாடகை, போக்கியம், நில ஆர்ஜித வழக்குகள், நீதிலன்ற ஜம்தி, தீர்ப்புக்கு முன் ஜம்தி, மத்திய, மாநில அரசு வரி வகையரா பாக்கிகள் போன்ற எவ்விதயான வில்லக்க விவகாரங்களும் கீழ்கண்ட சொத்தை பொறுத்து இல்லை என்றும், கீழ்கண்ட சொத்தை குறித்து உங்களை தவிர, உங்களுக்கு முன்போ, பின்போ, வேறு யாரிடத்திலும் பதிவு செய்யப்பட்ட அல்லது பதிவு செய்யப்படாத கிரைய உடன்படிக்கை ஏதும் ஏற்படுத்திக்கொள்ளவில்லை என்றும் உறுதி சுறுகிறேன்.

Ó

..3..

பின்னிட்டு ஏதாவது வில்லங்க வியாஜ்ஜியங்கள் இருந்து இக்கிரையத்துக்கு பிறகு வெளியாகி கீழ்காணும் சொத்தையும், அது சம்பந்தமாக உங்களை பாதிக்கும்பட்சத்தில் அதற்கு நானே முழு பொறுப்பு ஏற்றுக்கொண்டும், நானே முன்னின்றும் என் சொந்த சேலவிலும், எவது சொந்த பொறுப்பிலும், கீழ்கண்ட சொத்துக்கும், உங்களுக்கும் எவ்வித பாதிப்பும், பாதகமும் ஏற்படாத வண்ணம் நிவர்த்தி செய்து தகுகிறேன் என்று உறுதி கூறுகின்றேன்.

இக்கிரையத்திற்கு ஆதரவாக பேலே கண்ட 1108/2007, அசல் ஆவணத்தையும், 1815/2007-நே மற்றும் 4332/2011-நெ அசல் ஆவணங்களில் இன்னும் மாக்கி சொத்துக்கள் உள்ளதால் அவைகளுக்கு அத்தாட்சி செய்யப்பட்ட போட்டோ பிரதி மட்டும் நான் தங்களிடம் ஒப்படைத்துள்ளேன். இந்தப்படி நூன் மனப்பூர்வமாய் எழுதிக்கொடுத்த கிரைய ஆவணம்.

Safety Measures for Pipeline Laying

Component	Average Width (M) of Trench	Max. Pipe Dia (mm)	Max. depth of excavation (m)	Excavation method	Working area from edge of road (m)	Length of single working stretch (m)	Method for Traffic management	Other measures
Distribution System	Min Width – 600 mm; Max width - 1000mm	Min dia 110 mm Max dia 500 mm	Depth 1.4 m	Use of Machinery	If road width is > 40 ft -pipelines to be laid on both sides If road width is < 40 ft – pipelines to be laid on one side	150 m	Flagmen at both ends plus no parking sign for 100m on either end Only pedestrian traffic allowed	In one location, due to narrow width of road, pipeline will be laid in the middle of road
Gravity and PM	Min width - 1.2 m Max width - 2.4 m	Min dia - 550 mm Max dia - 1800 mm	Depth 2.8 m	Use of Machinery	On one side of road	100 m	Flagmen at both ends plus no parking sign for 100m on either end. Only pedestrian traffic allowed	

Notes:

- 1. Works will be carried out with due intimation to all the stakeholders.
- 2. All service providers (electricity, telecom, OFC, cable TV, gas etc.) shall be notified and consulted well in advance to identify bottlenecks and possible measures to resolve.
- 3. Reinstatement will be carried out in two phases temporary and final.
- 4. Special festival, business days in local bazar etc. will be strictly followed and works causing disturbance will not be carried out on those days.
- 5. No drainage channel shall be disturbed/stopped during construction works. Any drain affected by construction works shall be set right as early as possible and definitely before onset of monsoon.
- 6. The pedestrian area shall be always kept free from debris/trip hazard.
- 7. Environmental Management Plan (EMP) shall be strictly followed for all works and also dealing with any asbestos/ cement pipes.
- 8. Land contamination, if encountered, shall be immediately brought to the notice of the PIU/PMU and remedial measures shall be taken as advised. Disposal process of contaminated earth shall be carried out as advised by the PIU/PMU experts.(x) Night time work, if any, shall be carried out after due authorization with adequate safety and security measures. Acoustic hood shall be used on equipment to reduce noise pollution

Focus Group Discussion / Public Consultation Summary Tiruppur Water Supply Improvement Scheme

	Tiruppur Water Supply Improvement Scheme							
SI No.	Place	Participants	Topics discussed	Issues raised / Remarks				
1	Mettupalayam: Near narrow culvert at Raw water transmission mains	T–10, M–6, F–4 Road ide residents, Survey team TCMC Engineer, Engineer from Mettupalayam	1. Access to house, 2. Water stand post	1. This is residential area, having road side water stand post in front of houses. Road is very narrow with open drain. Additional stand posts required. 2. TMC Engineer explained that bulk water mains will be transported through elevated Bridgeway over this area, to avoid impact on the houses, as there is no space by road side to lay pipelines.				
2	Mettupalayam Near Railway crossing, Venkatashwara Temple	T–7, M–6, F–1 Temple committee members, Survey team, TCMC Engineer, Engineer from Mettupalayam	Passing of bulk water pipeline through underground tunnel	1. Blocka ge of access to temple for the worshippers 2. People refused to allow pipeline laying and want detailed discussion with PIU.				

SI No.	Place	Participants	Topics discussed	Issues raised / Remarks
3	Oddarpalayam village – Annur WTP site	T-14, M-9, F-5 Landowners providing land for WTP and access road to WTP survey team TCMC Engineer, Engineer from Mettupalayam	Consultation on 17 July 2018 1. Availa bility of backwash water for irrigation 2. Acces s to their land / house 3. Payme nt of Balance compensation	1. Farme rs from whom land was purchased by Tiruppur Exporters Association want permission for using waste water from WTP to be utilised for their agricultural field. As suggested by PPTA technical expert, filter waste water from WTP will be released into natural drainage system. The farmers can utilise the water from the natural drainage, if they want, on their own cost. This arrangement will be decided finally by PMU.

SI No.	Place	Participants	Topics discussed	Issues raised / Remarks
4	FGD at Ottarpalayam Landowners showing land parcels to survey team	T–15, M–8, F–7 Landowners and their family members at WTP site	Consultation on: 25 November 18 1. Final payment and notice prior to construction to harvest growing crops 2. Acces s to surplus backwash water 3. Emplo yment opportunity to member of the landowners' family 4. Conne ction with new drinking water scheme for each landowning household who gave land	1. Procur ing the land was initiated long back under AMRUT scheme. No involuntary resettlement issue is involved. Land was purchased through negotiated settlement and at market value agreed upon by the landowners. First instalment of payment was also paid earlier than ADB funded project was prepared. The final payment was made and land agreement finalized on 8th October 2018 for inclusion of the site in the ADB project.

SI	Place	Participanta	Topics	Issues raised
No.	Place	Participants	discussed	/ Remarks
5	Annur Highway crossing: Near Water Treatment Plant	T – 10, M - 10 Commercial Truckers, survey team, TMC Engineer, Engineer from Mettupalayam	1. Pipelin e laying/excavati on 2. Parkin g of commercial vehicles 3. Diversi on of traffic	1. Trucke rs are willing to pay fees if temporary parking place will be provided. There is a marshy land and embankment behind and hardly any space park trucks. The Bus terminus does not allow parking of private commercial vehicles to park inside.
6	Near Annur Bus terminus	T – 12, M- 12 Road side shop/stall vendors, Meat stall owners; Survey team, TCMC Engineer, Engineer from Mettupalayam	Acces s to shop Altern ate place for business	1. TMC engineer explained that no shifting will be necessary as the stall owners are doing business on raised platform and access to their shop for customers will be provided 2. Vulner able shop owners – mostly meat sellers - fear loss of business, as customers will not visit them.

SI No.	Place	Participants	Topics discussed	Issues raised / Remarks
7	Along Annur – Tiruppur road	T -7, M- 5, F -2 Road side vendors, Vegetable/fruit stalls, stationary vendors on footpath, survey team, TCMC Engineer, Engineer from Mettupalayam	1. Loss of business/custo mers 2. Appro ach to shop/ stall 3. No. of construction days to be notified 4. Decre ase in income	1. Wante d to know the number of days the shops will be closed. 2. Majorit y of their customers are tourists travelling along the highway – a major route from Tiruppur/Coim batore to Ooty. 3. They earn a profit @ ₹25-30 000 per month. 4. Some loss of income will occur
8	Karuvayur on Annur- Tiruppur road	T -4, M -3, F-1 Local residents, survey team, TCMC Engineer, Engineer from Mettupalayam	1. One CPR - deity of Hanuman installed on road sidewalk 2. People offer prayer/ puja consider this deity as Guarding god of the village	1. Local people offer puja but there is no caretaker or protective walls around 2. No committee or priest to take charge of. 3. TCMC Engineer commented that pipelines can be laid behind the Chabutara.

9.	AttayamPalayam, near Avinashi -Tiruppur Highway crossing	T – 5, M -5 Encroached structure/shop operators on covered drains, survey team, TCMC Engineer	Pipelin e alignment Dama ge to shops' frontal part, Loss of business	1. Alignm ent to be finalised 2. Tempo rary shifting to opposite side of road / free space is possible 3. TCMC engineer assured them of no need for frontal demolition of shops.

10 Alangadu slum Ward no. 56

T – 7, M- 3, F -4
Residents of the slum,
survey team, TCMC engineer

- 1. For about 500 HH residing here there are 7 stand posts for drinking water and 10 for untreated water
- 2. About 150 HH have individual connection of drinking water
- 3. Water supply every fourth day they get drinking water. Individually connected houses get 1.5 hrs of water supply every 5th day a week
- 4. They have to buy drinking water @Rs 40 per 20 litres container and four times a month for a family of 5 persons.
- 5. Untrea ted water is available for other household purposes in plenty.

- 1. Long queue for collecting water and time spent by individuals varies between 2-3 hours.
- 2. All are willing to get individual connection and are ready to pay for connection, and monthly water tax.
- 3. Most of the residents are workers in textile factory hosiery industry work as skilled workers in dying, knitting etc. Both male and female family members work.
- 4. Avera ge earnings range between ₹15000-20000 per month.
- 5. Wome n have formed 20 SHGs all the SHGs are functional. They are active participants helping TMC in fighting mosquito eradication.
- 6. They maintain and manage public toilets and charge

SI No.	Place	Participants	Topics discussed	Issues raised / Remarks
				individuals @ Rs 1-2 per head per use of toilet.
11	Kalipalayam, Zone-35	T -8, M- 6, F -2 Mobile vendors, Drivers, Local residents and member of the local body. Survey team, TCMC Engineer, Engineer from Mettupalayam	1. There are 2 stand posts for drinking water for 130 HH. 2. Only 15 to 20 HH have individual connection of drinking water 3. Drinkin g water quality is good but irregular. 4. Comm unity as a whole are supplied drinking water from the local authority.	1. Alway s there are long queues for collecting water. 2. All the residents participated in the consultation agreed to pay water tax for individual connections. 3. Quality and regularity of drinking water is the most important topic of discussion. 4. The quality of drinking water supplied in the tankers by the local authority is of poorer quality than that supplied by the private contractors. 5. The supply of water other than drinking water is plenty.

SI No.	Place	Participants	Topics discussed	Issues raised / Remarks
12	Palayakadu, Zone-31	T – 7, M -6, F -1 Local residents, survey team, TMC Engineer, Engineer from Mettupalayam	1. For 115 HH there is only one stand post for drinking water. So long queue, but water quality is good 2. Only few HHs have individual connection of drinking water	1. All the residents demand individual connection for drinking water supply facilities 2. Demand for free water supply by tankers in summer 3. Willing to pay more taxes / water tax for regular supply of drinking water.
13	Gate Thottam, Zone-32	T -8, M-6, F-2 Local residents, survey team, TMC Engineer, Engineer from Mettupalayam	Pipeline alignment, Temporary Impact to shops	1. Piped drinking water is in demand. No issue was raised by potentially impacted residents. Access to the Shops should be provided during the implementatio n by wooden plank.
14	Kovilvazhi, Zone-39	T –6, M-5, F-1 Local residents, survey team, TCMC Engineer, Engineer from Mettupalayam	Pipeline alignment, Temporary Impact to shops	1. There is only temporary impact to few mobile vendors. They could be shifted to opposite side.

Minutes of Meeting

Community consultation held with residents, burial ground users

Participants: Attendance sheet attached

- 1. Residents of the locality
- 2. Burial ground users
- 3. City corporation engineers
- 4. PPTA consultant

Concerns and Issues discussed:

- One OHT is proposed to be constructed within the burial ground compound. Soil testing has already been initiated. Land is identified.
- The area is partly occupied by graveyard and is used by the community regularly. However, there is enough space for installation of OHT. People do not have any objection, is permitting construction of OHT within burial ground compound.
- There are rows public toilets on one side of the boundary wall, which can be accessed from side road.
- The community want that there should be separate entrance and a boundary wall separating burial ground and OHT.
- They want to use the existing main entrance and a separate gate of about 8 ft height can be built for the OHT
- Boundary wall should be built all around the burial ground
- Residents now get drinking water for one hour every 4th day a week. They will be too happy to receive water from this OHT.
- During construction of boundary wall and gate people's representative will monitor and supervise.
- It is requested to the City Corporation engineers to show a footprint of the boundary wall and gate in a sketch drawing so that community also can give some opinion.

Decision taken:

One boundary wall separating burial ground and a separate entrance gate will be built and those may be included in the Contractor's scope of work. Cost will be included in the total project cost. Community may be taken into confidence while preparing footprint design (sketch drawing) of the boundary wall and gate in the available space.

Minutes of Meeting of Land Owners at Water Treatment Plant Site

Consultation held with Land owners selling land for WTP and a 30 ft wide access road Date: 25.11.2018 Time: 1 PM Place: Oddarpalayam village, near Annur ridge

Participants: Attendance sheet attached

- 1. Landowners and their families
- 2. City corporation engineers
- 3. PPTA consultant

Concerns and issues discussed:

- One plot of land was identified by Tiruppur Corporation for construction of WTP and access road to WTP site.
- Land purchase was initiated in early January 2018. Tiruppur Exporters' Association (TEA) has approached the land owners for negotiated settlement. 70% advance was paid by July 2018. Full and final payment was made on 8th October 2018. Agreement signed with the landowners by TEA on that day.
- Land compensation was paid through negotiated settlement and price decided as per Market Value guidelines and paid the landowners as per market rate established by Market Value guidelines. The landowners expressed their satisfaction regarding negotiated price of land and that they have no grievance about market valuation rate and accepted.
- The landowners expressed their request which they maintain have also stated at the time
 of negotiation. They want to utilize backwash /excess water from WTP, which will be
 constructed close by their agricultural land, for exclusive purpose of irrigation.
- Corporation engineers have confirmed that this concern has been noted during negotiation and included in the agreement (document to be sent by TCMC).
- Landowners also want to have house connection of clear water from Tiruppur present project. Since there is no OHT nearby which is connected to Clear water transmission mains at WTP site, it may not be possible to connect the houses with clear water mains with large dia. However, feasibility of this proposal can be examined by technical persons.

Decision taken:

Landowners' request for utilization of excess water from WTP will be placed before TNUIFSL and be reported in Resettlement Plan of Tlruppur WSIS subproject. TCMC engineers will judge if use of excess water can be permitted for irrigation purpose exclusively, and if so, cost of irrigating land will be borne by the landowners after exploring the technical options.

However, house connection issue may be difficult to resolve. This may be placed before city corporation for consideration.

Terms of Reference For Independent Third Party For Negotiated Settlement / Voluntary Donation

For any negotiated settlement / voluntary donation of land, an external independent entity will be identified by PMU to supervise and document the consultation process and validate the negotiated settlement/land donation process as per legal requirement.

TOR for Independent Third Party Witness

An independent third party is sought to be appointed to oversee and certify the process of negotiated settlement/donation. The third party shall be briefed about his/her expected role and deliverables by the SPO PMU.

Eligibility: The third party shall be a representative of the community (for example, a senior government officer, a leader of the community, a representative of a local NGO/CBO, principal of a local college/university professor), without any direct interest in the negotiation process, who is acceptable to each of the concerned parties (ULB and concerned land owner).

Scope of work: The role of the third party shall be to ensure a fair and transparent process of negotiation/donation. The envisaged scope of work shall entail the following:

- (i) Witness and keep a record of meetings held with the concerned parties,
- (ii) Ensure there is no coercion involved in the process of negotiated settlement/land donation,
- (iii) Ensure that the preferences and concerns of the land owner related to access, selection of site within lands held, etc. are recorded and any stipulated conditions met,
- (iv) Ensure that the negotiated settlement agreement is drafted in a fair and transparent manner,
- (v) Identify and recommend mitigation measures to land owner, if required,
- (vi) Ensure that taxes, stamp duties and registration fees for purchased land are borne by government, and
- (vii) Submit a certificate as witness to the purchase and transfer process.

Deliverables: The details of the meetings, and a certificate as witness to the negotiated settlement process and mitigation measures to owner, if any, shall be submitted by the third party to PMU, PIU and owner in the local language.
